Assignment 1:

Each student is required to create a unique landing page from scratch using only HTML and CSS. The landing page should have a clear purpose or theme, such as promoting a product, service, event, or personal portfolio. Students are encouraged to incorporate custom graphics, fonts, colors, and layouts to make their landing page stand out. The page should include essential elements such as a headline, subheadline, call-to-action button, and relevant content. Students should pay attention to responsiveness and ensure that their landing page is mobile-friendly.
